CROWNCORE ERP FOR NGOS & PROGRAMMES

Show every funder where their money went.

CrownCore's grant pack tags accounting entries to grants and budget lines, so programme spending can be compared with each grant's budget at any time.

Spending tagged to grants

Accounting entries carry the grant and budget line they belong to, set up as accounting dimensions during implementation.

Approvals before money moves

Payments and purchase orders above your limits wait for an authorised person, and every decision is on record.

The books, on demand

Balance sheet, income and expenditure, and cash flow come from the same ledger the programme spending is recorded in.

Built for how Zimbabwe works

- Grant utilisation reporting against budget lines
- Accounts in USD and ZWG, with exchange differences recorded
- Expense claims and advances approved before payment
- Activity and access reviews for audit
- ZIMRA FDMS certified fiscalisation; each business registers its own fiscal devices

Does CrownCore produce our donors' report formats?

Grant utilisation reporting is included. Donor-specific report formats are scoped separately during implementation.

Can we keep separate budgets per grant?

Yes. Each grant's budget lines are set up as accounting dimensions, and spending is compared with them.
