CROWNCORE ERP FOR SERVICES & PROJECTS

Deliver the work, bill it, and pay the people doing it.

CrownCore keeps a project's tasks, the people working on it, what it costs and what the client is billed in one place, alongside your accounts.

Every task on one timeline

Plan projects as tasks, see them across all your projects on a timeline, and follow progress from the first survey to handover.

Assets accounted for

Keep vehicles, equipment and other assets on record with their cost, location and depreciation, alongside the accounts.

Payroll for the team

Pay staff in USD, ZWG or both, with PAYE, NSSA, NEC and the AIDS levy worked out, leave balances kept, and statutory returns prepared.

Built for how Zimbabwe works

- Zimbabwe payroll in USD and ZWG, taxed as ZIMRA sets out
- Leave by the Labour Act: sick and maternity leave included
- Customer invoices with VAT, and statements in PDF
- Expense claims approved before finance pays them
- ZIMRA FDMS certified fiscalisation; each business registers its own fiscal devices

Can staff see their own payslips and leave?

Yes. Employees use self-service to see payslips and leave, and to request leave from their manager.

Can we invoice clients from a project?

Yes. Customer invoices are raised in accounts with the project recorded, so you can see what each project has billed.
